Build a NanoGrid around your site

Powering up to 4 of the BioLite SiteLights™

450 lumens total output

200 lumens lantern, 250 lumens torch

part of the
BioLite NanoGrid

The PowerLight 2-in-1 rechargeable lantern, torch and USB power bank is the foundation of a complete NanoGrid™ system for light and energy sharing in off-grid environments. The powerful 4,400 mAh Li-Ion battery can be recharged from any USB source (including BioLite products) and then share power to any of your USB chargeable gear. Innovative edge-lighting eliminates hotspots while providing 360° of soft even light in a compact form factor. Extend your energy grid by attaching our compact, daisy-chainable SiteLights™ around your campsite. The ergonomic design makes it easy and intuitive to operate while the S-hook friction hold allows you to hang and angle the product off of just about anything. Bring home-quality lighting wherever you go with this compact, weather-resistant energy hub.

ADDITIONAL FEATURES

Edge-lighting technology - soft light, high brightness, maximum compactness

Versatile 360° S-hook - hang, mount, and rotate

Battery indicator - for easy-ready charge levels
